

De'Jour Ford

Front-End Developer

SUMMARY

Creative, detail-oriented, software engineer with a deep interest in Front-End Development. Proven track record of creating and implementing and deploying successful front end websites with great visual design. Looking to bring my skills to a tech company with global reach.

WORK EXPERIENCE

Front-End Developer at 100devs | Los Angeles, CA

June 2022 — Present

- Collaborated with a team of developers to build modern and responsive web applications using best practices
- Built semantically structured full stack web applications
- Applied agile methodologies like SCRUM for project management

Recent Projects:

E-Commerce Website- This project is a responsive e-commerce site made with HTML, CSS, and Javascript. The client can browse different categories of products and view its details. Client can then add items to a shopping cart which can also be viewed.

CarMe Rental Car Website- This project is a responsive car rental website with different pages made using HTML, CSS, and Javascript. The layout is created using flexbox and grid. Using DOM manipulation, the client is able to dynamically view a car and its details.

Septien Entertainment Website – This project is a fully responsive website I developed for a local singing agency. I developed this site as a prototype to be submitted for approval. The site is made using HTML, CSS, Javascript, and FontAwesome.

NBA Best Player Full Stack App- Client can type the name of a basketball team and they will receive an image and text of the best player on that team displayed in the DOM. RESTapi was used for this full stack app along with express. The project is hosted on Heroku.
