Employment

Front-End Developer Bootcamp **100Devs** **June 2022-Present**

- Collaborated with a team of developers to build modern and responsive web applications using best practices by sharing experiences and documenting the areas of improvement.
- Built semantically structured full stack web applications using HTML, CSS, Javascript, NodeJS, Express, and MongoDB
- Created a project management system for the team by applying agile methodologies like SCRUM

Senior Pharmacy Technician **Walgreens** **Aug 2013-Dec 2022**

- Responsible for entering, processing, and filling new prescriptions for patients
- Decreased errors in the pharmacy by training and supporting new and less experienced technicians
- Utilized a Walgreens specific software, Intercom Plus, to decrease errors and increase efficiency
- Played a key role in inventory management and maintaining pharmacy compliance to ensure the highest level of patient care and safety

Software Projects

Septien Entertainment Agency Website (septien-website.netlify.app)

- Developed a responsive website for a local singing agency utilizing HTML, CSS, and Javascript
- Incorporated Font Awesome for modern iconography
- Resulted in a sleek and modern website that effectively showcases the agency's services and talent to potential clients

De'Jour E-Commerce Site (dejour-ecommerce-store.netlify.app)

- Developed a responsive e-commerce site utilizing HTML, CSS, and Javascript
- Implemented RestAPI which allows client to view products of different categories
- Enables clients to add items to their shopping cart and view them in the cart as needed

CarMe Rental Car Website (dejourford.github.io/car-me/)

- Developed a responsive car rental website utilizing HTML, CSS, and Javascript
- Implemented a modern design by utilizing flexbox and grid layouts
- Incorporated DOM manipulation enabling clients to dynamically view car options and their details resulting in a more efficient and user-friendly process

NBA Team's Best Player App (dejour-basketball-api.herokuapp.com)

- Developed a full stack application that allows clients to search for a specific team by name and receive an image and text of the team's best player displayed in the DOM
- Implemented Back End services by utilizing REST API, NodeJS, and Express
- Incorporated Heroku to have access to a server to grant access to the application worldwide
- Resulted in a user-friendly and informative experience for basketball enthusiasts and fans alike
